

Abbey School
Maths Strategies – Reception
2020-2021

In Reception we cover many different mathematical strategies, from counting using 1:1 correspondence, understanding place value and the conservation of number.

We often work in a practical way. Using a hands-on approach and will use lots of questioning techniques and the environment around us.

For example...

1. How many trees can you see? Which is the tallest / the shortest / the widest?
2. Can you estimate (guess) how many trees there are? Is that number more or less than..?
3. Can you add this number of trees to this number of trees? How many do we have altogether?
